

Jane's Personal Website

To run and update locally:

1. First go to private folder and make changes via

```
npm run dev
```

2. After updating, generate build files by running

```
npm run build
```

3. Then copy it over to Github pages using

```
cp -r build/* ../janeon.github.io/
```

TODOS:

- ☐ Check mobile compatibility
- ☐ Generate html for publications
- ☐ Fix header linking style
